

“
As our region faces the devastating impact of ongoing conflict and instability, our thoughts are first and foremost with you and your teams. We hope that you are remaining safe during these incredibly difficult times.

Furthermore, we emphasize the fundamental right of all vulnerable groups, particularly people who use drugs, to have uninterrupted access to comprehensive health services. Our collective mission is to ensure that no one is excluded from the healthcare system, especially when the obstacles to reaching care are at their greatest.

«Elie Aaraj, Executive Director of MENAHRRA»
